

Product Information SF¹

Compact Loudspeaker Base

The Dynaudio SF¹ is the ideal base for positioning small or medium-sized compact loudspeakers upon sideboards, shelves or desks.

The SF¹ Base optimizes loudspeaker performance with minimum effort or space: The SF¹ places the speaker with a slight upward tilt, thus minimizing the impact of surface reflections on the sound quality which would otherwise occur from the underlying foundation. Furthermore, the tilted speakers take on a more attractive appearance.

Simple yet stable, the SF¹ Base allows an elegant integration of any loudspeaker into any interior. In any room that does not permit an acoustically ideal positioning of loudspeakers on stands, the SF¹ Base enables an optimized speaker performance, in a functional design, while requiring a minimum amount of space.

The SF¹ Base is ideal for use with the Dynaudio Focus 110, 110 A, and 140, Excite X12 and X16 models, as well as many other compact loudspeaker offerings. It is available in matt black or silver finish.

Dimensions and Weight

Dimensions (W x D)	187 x 208 cm / 7.4 x 8.2"
--------------------	---------------------------

Finishes	silver, black
